EDUCATION

Southern New Hampshire University
Bachelor of Science in Computer Science

Manchester, NH
Graduated 2026

TECHNICAL SKILLS

Languages: Python, SQL (Postgres), HTML/CSS
Analytics & Visualization: Excel, Tableau, Data Cleaning, Data Visualization, Exploratory Data Analysis
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, GitHub, VS Code, Jupyter Notebook
Libraries: Pandas, NumPy, Matplotlib, Plotly, Dash, Requests, SQLAlchemy

PROJECTS

Retail Price Intelligence Platform | *Python, PostgreSQL, REST APIs, SQL, Git* In Progress

- Building an end-to-end retail analytics platform that collects product pricing data from public retailer APIs.
- Developing automated ETL pipelines in Python to extract, transform, and load pricing data into PostgreSQL.
- Writing SQL queries to analyze historical pricing trends, competitor pricing, and product availability.
- Implementing data validation processes to identify duplicate, missing, and inconsistent records before analysis.
- Version controlling development with Git while designing a scalable architecture for future dashboard integration.

California Gas Price Analysis | *PostgreSQL, SQL, Excel, Tableau* 2026

- Cleaned and analyzed 15,000+ gasoline price records across 300+ California cities using PostgreSQL.
- Developed SQL queries utilizing JOINS, GROUP BY, HAVING, CASE statements, and aggregate functions to uncover regional pricing trends.
- Created Tableau dashboards visualizing fuel prices by city, fuel grade, and geographic region.
- Built Excel pivot tables and summary reports to communicate pricing insights and support data-driven decision making.
- Identified pricing patterns showing San Francisco fuel prices averaged approximately 12% higher than San Diego.

Animal Shelter Analytics Dashboard | *Python, MongoDB, Dash, Plotly* 2025

- Developed an interactive analytics dashboard to visualize and explore animal shelter data stored in MongoDB.
- Integrated Python with MongoDB to perform CRUD operations and dynamically query shelter records based on user-selected filters.
- Designed interactive Dash and Plotly visualizations, including charts and geographic mapping, to support data exploration and decision making.
- Applied data visualization techniques to transform raw shelter data into meaningful insights for end users.
- Built a responsive dashboard interface that enabled users to efficiently analyze shelter records through interactive filtering and visual reporting.

EXPERIENCE

Walmart
OPD InHome Delivery Associate

Houston, TX
May 2020 – Present

- Managed the fulfillment and delivery of 40+ customer orders daily while maintaining high standards of accuracy, efficiency, and customer satisfaction.
- Utilized Walmart's inventory management systems and handheld technology to verify product availability, resolve discrepancies, and ensure accurate order fulfillment.
- Collaborated with cross-functional teams across Online Pickup & Delivery, InHome, and store operations to prioritize orders and improve workflow efficiency in a fast-paced environment.
- Maintained productivity and quality metrics by consistently meeting operational goals while adapting to changing customer demand and business priorities.
- Delivered exceptional customer service by resolving delivery issues, communicating order updates, and ensuring a positive customer experience during every delivery.
